MACHINE SPECIFICATIONS

MATERIAL: Paper thickness: .009" to .024" (0.230 mm to 0.500 mm).

APPROXIMATE MACHINE WEIGHT:
Machine weight: 25,000 lbs (11,340 kg)
Electrical weight: 700 lbs (318 kg)

SIZE RANGE:
Machine width: 25" to 50" (635 mm to 1270 mm)
Machine height: 60" (1525 mm)
Machine depth: 5000 lbs (2270 kg)

FOOT PRINT (WITH UNWIND STAND):
14.5' x 25' (2.7 m x 7.6 m)

SERVO-DRIVEN TECHNOLOGY

PMC manufactures a comprehensive line of machines for every forming operation, the HS 800 high-speed die cutting machine like every PMC machine. The HS 800 builds on the tradition of continuous innovation and improvement it offers fast flexible production of sidewall blanks for paper cups and containers. Advanced servo drives high speed print to cut accuracy the HS 800 meets the needs of high-volume converters and producers running at a top speed of 450 strokes per minute a single unit supports multiple high-speed cut machines to maintain production around the clock.
